We just had a few comments on Model 170:

Section 3: Consider adding the following, or a similar, definition: “Short Term Medical Expense Coverage” means a policy or certificate that provides nonrenewable accident and sickness coverage for a period of twelve (12) months or less.

Section 5:

- Appears to be a typo in 5(A): “…and group supplemental health insurance.. to The regulation…”
- Delete A(5), Individual Major Medical Expense Coverage, as this subsection will be rendered obsolete due to the new Individual Market Health Insurance Coverage Model
- Consider adding a new category of coverage, Short Term Medical Expense Coverage.
