E-Mail Comments from PA (Chris Monohan)

Here are some proposed standards for accreditation. They are at a very high level and can be tweaked to add more specifics if/when needed:
- Establish minimum staffing compliments for Market Regulation units in each state based on the number of companies licensed in each state;
- Establish minimum training/certifications required to be an examiner or analyst (i.e.: CIE, AIE, MCM certifications);
- Establish minimum salary requirements and guidelines for Market Regulation positions;
- Establish minimum guidelines for contract vendors and then require states to use only approved vendors to remain accredited;
