**Subject:** RE: NAIC Notice: Special Accreditation Standards (D) Working Group Accreditation Proposal Concept (2009-07-20)

Kentucky's responses to the Draft Market Regulation Accreditation Proposal dated July 20, 2009 are as follows:

We are in agreement with three basic goals consisting of:

- a. The creation of accreditation standards that are objectively measurable;
- b. Raising the quality and performance level of market regulation activities within insurance departments through accreditation; and
- c. Providing flexibility in the accreditation process so as to accommodate state differences.
