MLR EXAMINATION REPORTING INSTRUCTIONS

Introduction
Under the Patient Protection and Affordable Care Act, health insurers are subject to an audit/examination of their medical loss ratio (MLR) reporting and related rebate obligations. The Code of Federal Regulation (CFR), Title 45, Part 158.403, allows the U.S. Department of Health and Human Services (HHS) to accept the finding of a State’s audit/examination provided certain criteria are met.

This option is designed to increase efficiencies by allowing regulators already familiar with the insurer and their operations to perform the procedures.

States’ completion of audit/examination procedures of insurers’ MLR reporting and rebate obligations and subsequent reporting to HHS is optional and should be determined by the individual State. The following instructions and related procedures serve as the framework for States completing the necessary procedures to report on the medical loss ratio as determined in 45 CFR §158.403. Deviation from these instructions and related procedures based on examiner judgment or other conditions is permissible, but may be subject to review by HHS prior to accepting the State’s work to fulfill the audit/examination requirements. (Significant deviation could result in HHS not accepting the State’s work/conclusions and result in HHS conducting a separate audit/examination.)

The MLR compliance procedures are designed to be completed by financial examiners. However, market conduct examiners or others within the State agency who possess the necessary skills may perform the procedures, as determined by the State. The procedures may be completed every 3-5 years in conjunction with the standard financial examination interval or more frequently, as deemed necessary. They may be applied as part of a full scope examination or on a targeted basis as a stand-alone review.

Communication with HHS
The determination by the State to perform the MLR reporting and rebate examination procedures should be communicated by the State to HHS as soon as possible. Early notification will make HHS aware of the reports they should expect to receive in any given year and thus may assist HHS when scheduling its audits/examinations. If the procedures will be completed in conjunction with a financial or market examination, the determination to conduct the MLR audit/examination procedures and subsequent communication to HHS and the company should be made no later than the time the examination is called. If the procedures will be performed independently of a scheduled State examination, the determination and communication should be made at least 45 days prior to the start of the audit/examination to both HHS and the company.

Please communicate this information to HHS at MLRQuestions@cms.hhs.gov or (301) 492-4457.

The determination by HHS to conduct an MLR audit/examination will also be communicated to the State of domicile for the insurer. Once companies are selected for examination by HHS, each State will be notified of the intent to perform the audit/examination and will be encouraged to coordinate reliance on MLR work performed by the State if applicable.
Completing the MLR Procedures Spreadsheet
Completion of the MLR Procedures Spreadsheet (Exhibit 1) is recommended to facilitate the completion of the public report required under 45 CFR §158.403. Application of the procedures contained in this spreadsheet is designed to allow HHS to place reliance on work performed by the State and reduce potential duplication of effort. If procedures are directed by the MLR Reporting Spreadsheet and shared with HHS upon request, the intention of HHS is to rely on the work performed by the State, without re-performance. In certain instances, primarily when an issue is identified, additional work may be necessary and will be determined on a case by case basis.

The spreadsheet should be made available to HHS upon request as a result of questions, identified issues, or the possibility of penalties assessed by HHS. When HHS requests the supporting work, a State may want to enter into a Non-Disclosure Agreement with HHS that addresses the use and confidentiality, to the extent permitted by law, of any shared workpapers and reports. This agreement should encompass the spreadsheet and referenced workpapers to ensure the confidentiality of detail work. Keeping this information within the spreadsheet and referenced workpapers will provide an easily accessible communication tool and limit the information accessed to procedures performed directly for the MLR report.

Purpose
The Purpose column directs the examiner to address each element of 45 CFR Part 158. While there may be reasons that procedures deviate from the template as discussed below, each purpose should be addressed unless it is clearly not applicable due to the circumstances of the insurer. If there are deviations from the listed procedures or if a procedure is not applicable, the description of work performed should include a brief statement explaining the deviation and/or the exclusion of that area.

Possible Compliance Procedures
This section contains the standard procedures for audit/examination of MLR and rebate reporting as developed by HHS in consultation with the NAIC. They are to be used as a base when performing procedures to satisfy the audit/examination requirements in 45 CFR §158.403. No revisions are necessary to this column and a full explanation of the procedures tailored to fit the needs of the insurer being examined should be included in the Description of Work Performed column.

Description of Work Performed
This section requires a customized description of the testing performed to satisfy the purpose defined for each applicable row. As the operations of each insurer may differ, modifications based on examiner judgment and knowledge of the insurer’s processes may be necessary to appropriately complete this section. When applicable, the level of detail in this column must include sample size, population used for sampling or reviewing documents, titles of reports used, account numbers reviewed, etc. The procedures will typically closely follow the standards defined in the previous column. However, in some cases, an approach that includes control testing or other alternative testing may be appropriate. In such instances, there should be a description of how the control testing met the objective of the procedure that it replaced.

Adopted 6-26-14
Any related workpapers should be referenced directly on this spreadsheet. This spreadsheet, along with the workpapers referenced, should encompass the complete testing of the medical loss ratio for reporting as defined by 45 CFR §158.403. This will enable the State to clearly define the supporting work utilized to report on the medical loss ratio and provide the work contained therein to HHS, if necessary, to use as a basis for further investigation and/or imposition of penalties.

**Summary of Results**
The results derived from completion of the specific procedures identified in the previous column, including any findings such as exceptions or deficiencies observed, should be stated in this column. They should be clearly stated to provide HHS with the information necessary to make judgments regarding compliance and future action, if any. The State is not responsible for confirming compliance with the federal regulation.

**Reporting Requirements**
Once the procedures are completed, the report should be prepared using the sample language provided (Exhibit 2). This language is designed for inclusion in the standard financial examination report, but can easily be adapted for inclusion in a market conduct examination report. To comply with 45 CFR §158.403 this report must be a public document. If the standard (financial) examination report is not a public document per state law, the State should work with HHS to determine if an alternative reporting method is feasible.

Under 45 CFR §158.403, HHS should receive the preliminary or draft exam report from the State within six months of the completion of fieldwork (unless the report has already been finalized and provided to HHS). Once the report is finalized, HHS is required to receive the final report from the State within 30 days.

**Alternative Option**
At the State’s discretion, an alternative reporting method may be used, such as preparing a stand-alone report independent of the standard financial examination report. If this or any other alternative report format is chosen, the State should work directly with HHS to establish a public reporting method acceptable to both parties.

**Additional Recommendations for Completion**

*Utilizing the Work of Others*
The examiner must first consider the scope of work performed by a third party (i.e., external audit/examination, internal audit/examination, other State work, etc.) to determine whether, and to what extent, she or he can rely on the work performed. When work performed by a third party is deemed applicable to a given procedure, this work may be utilized within the spreadsheet to support the report provided to HHS. All third party work used for this purpose must be referenced directly to the MLR Reporting Spreadsheet and be available for review if necessary. The examiner must clearly state the purpose and conclusions of the third party testing performed and define the procedures within the MLR Reporting Spreadsheet. No re-testing is required; however, the examiner must perform a review with enough depth to ensure the procedures appropriately address the sub-activity and purpose set forth.
Multi-state Entities

When procedures are performed for entities that write business in multiple states or are part of a holding company system, the state calling the examination should conduct the MLR procedures on the MLR report submitted to HHS. This includes all MLR Form filings (State/Market) associated with the MLR Report to the Secretary. For example, if an issuer provides health insurance coverage in several State/Market combinations other than the domiciliary State, the audit/examination should include all the States/Markets for the purposes of reporting on “an issuer’s MLR reporting and rebate obligations.” If the State chooses to apply procedures only to the business in the domiciliary state, HHS will work with the State to rely on the procedures performed, but may perform additional testing to fulfill the federal audit requirements. Examination of the allocation of holding group expenses is also a necessary part of an examination in order to be accepted under 45 CFR Part 158. The State should make an effort to coordinate with other states whenever possible and notify them that the MLR procedures will be part of the examination.

Recommendations for Specific Procedure Steps (as numbered on the Procedures Spreadsheet)

The following suggestions have been offered up by various State regulators in an effort to share knowledge of the review process. The following suggestions should not be considered required in any way, but instead, a helpful tool if deemed appropriate for the circumstances of a specific insurer.

**Item No. 2:** Include a detailed description of the procedure specific to the insurer, such as general ledger accounts reviewed, and the sample size that was deemed appropriate. To determine procedures and samples, the following is recommended:

1) Request the data by MLR segment (individual, small group, large group);
2) Base the sample of policies on the total premiums/claims reported per MLR segment; and
3) Ensure proper fields are included in your data request, such as number of employees, to verify small group/large group. Typically, an insurer defines large and small group by the number of subscribers enrolled rather than the total number of employees. In this situation, a reclassification or re-segmentation adjustment entry may have been made to comply with the federal definition of group size. This journal entry may provide the starting point to test the accuracy of the data aggregation.

**Item Nos. 20 and 22:** When requesting data, consider requesting a report with the following minimum fields: policy number, subscriber or group number, line-of-business, premium, rebate amount, date paid, check number, etc.

</table>
| 1   | §158.110   | Test accuracy of reporting and reconcile with the Supplemental Health Care Exhibit | 1) Verify that the issuer completed the federal MLR Annual Reporting Form (MLR Form) for every state for which they submitted the Supplemental Health Care Exhibit (SHCE).  
2) Verify that the amounts reported on the MLR Form are consistent with the amounts reported on the SHCE. Use the NAIC’s MLR Reconciliation Report or similar tool to check for variations between the SHCE and the MLR Form. |                                |                                |
| 2   | §158.110   | Test accuracy of state and market classifications | Select a sample of individual and group policies entity-wide. Review supporting contract documents and general ledger accounts to verify that:  
1) Policies were assigned to the correct state i.e., by situs with exceptions noted in the regulation.  
2) Policies were assigned to the correct line of business. Verify that:  
   a. Business subject to the commercial MLR rule was reported in the Health Insurance Coverage columns.  
   b. Business not subject to the commercial MLR rule was reported as government program plans, other health business, or uninsured plans.  
   c. Policies with annual limits < $250,000 were reported separately as mini-med policies.  
   d. Policies meeting the definition of Expatriate policies under §158.120(d)(4) were reported separately from other policies and aggregated nationally.  
   e. Policies in the student market were reported separately from other policies and aggregated nationally starting in 2013.  
3) Policies are assigned to the correct market (individual, small group, large group). For the group markets, verify that:  
   a. Group size is based on the number of employees and not the number of subscribers (i.e., included active employees even if they were not enrolled in the plan).  
   b. Employers with ≥ 100 employees were assigned to the large group market. (Or other number, if applicable.) |                                |                                |

---

2 Until 2016, states may substitute “50” employees for “100” employees to differentiate the small and large group markets.

| 3   | §158.120(c) | Test accuracy of reporting under the dual contracts option | 1) If an issuer opted to report an out-of-network issuer’s experience with the in-network issuer’s experience under the dual contract option, verify that:  
   a. The in-network issuer reported all components of the out-of-network experience, including premiums, taxes and fees, claims, quality improving expenses, and non-claims costs.  
   b. The option was or will be consistently applied for at least three consecutive reporting years.  
   c. Corresponding adjustments were made to the MLR Form for the out-of-network issuer. *This will require obtaining the out-of-network issuer’s MLR Form.*  
   [Dual Contracts=Pt 1 Dual Contract column] | | |
| 4   | §158.121   | Test accuracy of reporting for new business | 1) If an issuer opted to exclude new business from their MLR calculation, verify that:  
   a. 50% or more of the total earned premiums for the MLR reporting year is attributable to policies newly issued and with less than 12 months of experience in that MLR reporting year.  
   b. The issuer excluded all components of the new business, including premiums, taxes and fees, claims, quality improvement expenses, and non-claims costs.  
   [Deferred Business CY=Pt 1 Deferred CY (subtract) column]  
   2) Obtain the issuer’s prior year MLR Form. If newly written business was excluded in the prior year, verify that:  
   a. The prior year’s deferred business was added back to the subsequent year’s MLR Form in the same state and market.  
   b. The criteria for deferral were met in the prior year.  
   [Deferred Business PY=Pt 1 Deferred PY1 (Add) column] | | |
| 5   | §158.130   | Test accuracy of reporting of earned premiums | Verify that:  
   1) Earned premiums were reported on a direct basis.  
   2) Earned premiums were adjusted to account for high risk pool assessments or subsidies, group conversion charges, and unearned premium.  
   3) Experience rating refunds are reflected in claims rather than premiums.  
   [Premiums=Pts 1 and 2, Sec 1; Pt 4 Sec 2] | | |

| 9   | §158.161    | Test accuracy of reporting of taxes and regulatory fees | Obtain documentation for assessments, fees, and taxes (including inter-company tax allocation agreements) and verify that:  
1) Taxes and fees were reported in accordance with the regulation.  
2) Taxes and fees reported in Parts 1 and 2 of the MLR Form are consistent with the taxes and fees described in Part 3 of the MLR Form.  
\[\text{Taxes and regulatory fees} = \text{Pt 1 Sec 3}; \text{Pt 3 Sec 2}; \text{Pt 4 Ln 2.2}\] | | |
| 10  | §158.170    | Test reasonableness and accuracy of expense allocations | 1) Verify reasonableness and accuracy of the allocation of taxes and expenses among states, lines of business and markets, and among affiliated issuers within a holding company. Include states and markets where the entity has business that isn’t subject to the commercial MLR rule (i.e., government program plans, other health business, uninsured plans).  
2) Verify that the issuer’s allocation methods are consistent with the narrative provided in Part 3 of the MLR Form.  
\[\text{Expense allocation} = \text{Pt 3}\] | | |
| 11  | §158.210    | Test accuracy of the MLR standard | Verify that the issuer used the correct MLR standard for every state and market. The MLR standard should be one of the following:  
- 80% in the individual and small group markets, and 85% in the large group market;  
- A higher standard as prescribed by state law³; or  
- The adjusted state standard in the individual market approved by the Secretary under 45 CFR 158 Subpart C.⁴  
\[\text{MLR standard} = \text{Pt 4 Ln 5.1}\] | | |
| 12  | §158.210    | Test aggregation of data in the MLR numerator | 1) Verify that the Total column for the MLR numerator is the sum of the PY2, PY1, and CY columns, except that:  
a. For states in which different MLR standards applied to different reporting years, an issuer may add to the numerator the difference between the MLR standards | | |

---

¹ Massachusetts has a higher state MLR standard of 88% - 90% in the individual and small group markets, depending on the reporting year. New York has a higher state MLR standard of 82% in the individual and small group markets.

³ The Secretary granted adjustments to the MLR standard in the individual market in Georgia, Iowa, Kentucky, North Carolina, Nevada, Massachusetts, Maine, and New Hampshire for 2011 and/or 2012.

| 4   |             |         | 4) Beginning with the 2013 reporting year, verify that the base credibility factor is 0 when both of the following conditions are met: a. The current MLR reporting year and each of the two previous MLR reporting years included experience of at least 1,000 life-years; and b. Without applying any credibility adjustment, the issuer’s MLR for the current MLR reporting year and each of the two previous MLR reporting years were below the applicable MLR standard for each year as established under §158.210.  
*Base credibility factor=[Pt 4 Ln 3.2, Total column]*  
*If exceptions were noted in the issuer’s aggregate number of life-years, recalculate the base credibility factor using the accurate numbers obtained during examination.* |                               |                               |                   |
| 18  | §158.232 (c) | Test accuracy of the deductible factor | 1) Select a sample of states and markets with a base credibility factor > 0. Use the issuer’s data records, including policy forms, group contracts, and enrollment data from 2011, 2012, and 2013 to calculate the average health plan deductible.⁷  
  2) Verify that the average deductible calculated above matches the amount reported on the issuer’s MLR Form.  
*Average Deductible=[Pt 4 Ln 3.3, Total column]*  
  3) Use the Annual Reporting Form Calculator and Formula Tool on the CMS website or similar tool to verify that the deductible factor is accurate and unrounded.  
*Deductible factor=[Pt 4 Ln 3.4, Total column]*  
*If exceptions were noted in the issuer’s average deductible, recalculate the deductible factor using the accurate numbers obtained during examination.* |                               |                   |

---

⁷ To calculate the average deductible, multiply the per-person deductibles by the applicable number of life-years, aggregate the results, and then divide by the total number of life-years in the state and market for all of the issuer’s policies with the same per-person deductible level. The per-person deductible for a family policy is the lesser of the individual deductibles or one half of the family deductible. If the issuer has products with differing deductibles, use a similar process to calculate the average deductible across all deductible levels weighted by life-years.

| 20  | §158.240 §158.241 §158.242 | Test accuracy of rebate payments | 1) Verify that the issuer paid rebates in every state/market in which a rebate was owed.  
2) Select a sample of rebate payments and verify that:  
a. The amount of the rebate is equal to the difference between the issuer’s credibility adjusted MLR and the MLR standard in the state/market, multiplied by the subscriber/policyholder’s premium after adjusting for taxes and regulatory fees. \( \text{Rebate amount} = \text{Pt 4 Ln 5.4, Total column} \)  
b. For rebates distributed via premium credit, the rebate was fully applied before any new cash was paid by the enrollee. \( \text{Premium credit} = \text{Pt 5 Ln 3.c} \)  
3) Verify that payment was made on or before August 1 subsequent to the end of the MLR reporting year. For rebate payments disbursed after August 1, verify that the payment included interest at the Federal Reserve Board lending rate or 10% annually, whichever is higher. If exceptions were noted in the issuer’s MLR or MLR standard, recalculate the rebate amount using the accurate numbers obtained during examination. | | |
| 21  | §158.243 | Test accuracy of the distribution of de minimis rebates | 1) If an issuer did not provide rebates to subscribers/policyholders whose rebate were de minimis, verify that the issuer accurately classified de minimis rebates as rebate payments <$5 in the individual market and <$20 in the small and large group markets.  
2) Select a sample of the issuer’s non-de minimis rebate payments and verify that they include a pro-rata portion of the aggregated de minimis rebates. \( \text{De minimis rebates} = \text{Pt 5 Ln 3.b} \) | | |

¹Adopted 6-26-14
Medical Loss Ratio Reporting

The Affordable Care Act (ACA) requires insurers to spend a minimum percentage of premium dollars on medical services and activities designed to improve health care quality and submit a medical loss ratio (MLR) report to present this information. The Department reviewed the components of the MLR Report filings by utilizing the MLR Procedures Spreadsheet provided by the Center for Consumer Information and Insurance Oversight to review and test, as deemed appropriate, the following items in accordance with 45 CFR Part 158: validity of the data regarding expenses and premiums that the issuer reported to the Secretary, including the appropriateness of the allocations of expenses used in such reporting, whether the activities associated with the issuer’s reported expenditures for quality improving activities meet the definition of such activities, the accuracy of rebate calculations, and the timeliness and accuracy of rebate payments as applicable.

Per our review, no items came to our attention indicating an exception or finding that requires additional disclosure [with the exception of the following:]

Sample Comments / Findings
(Only complete if exceptions were identified)

The Company’s MLR form filing was not filed by the required date of June 1st and/or in the manner prescribed by HHS for the MLR reporting year examined.

Financial data elements tested related to the MLR numerator (total incurred claims, deductible fraud and quality improving activities) as defined within 45 CFR Part 158, were not properly reported… (provide details, note financial reporting impact on the MLR calculation).

Quality improving activities tested do not meet the definition of such activities under 45 CFR Part 158… (provide details, note financial reporting impact on the MLR calculation).

Financial data elements tested related to the MLR denominator (total earned premium and taxes) as defined within 45 CFR Part 158, were not properly reported … (provide details, note financial reporting impact on the MLR calculation).

Concerns were identified in regard to the Company’s expense allocation methodology used to report to HHS… (provide details, note financial reporting impact on the MLR calculation).

(Include only if rebate calculation is wrong due to noted errors)

The (error/errors) noted above, (resulted/did not result) in a change in MLR calculation and the MLR rebates to be paid to enrollees in the following states and markets (List States and markets).

Summary of Recommendations
(Only complete if exceptions were identified)

It is recommended that the Company develop controls and business processes sufficient to mitigate risk associated with the reporting and payment requirements of 45 CFR Part 158.
