Re: Calculation of Medical Loss Ratio Recommendations

Dear Mr. Felice, Mr. Ostlund, and Subgroup members:

The Chicago Park District is the lead provider of recreation, leisure and culture to thousands of Chicagoans inclusive to all ages and abilities. As Wellness Manager of the Chicago Park District, our wellness initiatives focus on offering many active and healthy opportunities.

I am writing to urge the National Association of Insurance Commissioners (NAIC) to consider and recommend to the Department of Health and Human Services (HHS) a definition of medical loss ratio (MLR) that will encourage health plans to continue their tremendous support of community-based public health initiatives and programs.

The membership of NAIC is state-based and so should understand well the important contributions that local organizations make to the overall health of communities and populations. I want to make sure that health insurers will continue their critical participation in these efforts.

It is my understanding that if the definitions around MLR are too narrow, health insurers will not be encouraged to support community-based health initiatives and could, in fact, be penalized for such support if their contributions are counted as administrative expenses. Penalizing support of my organization’s program and similar community-based programs across the nation would not be wise public policy, as it would negatively affect many strong community active programming for many.

I strongly urge the NAIC to recommend to HHS that for the purpose of calculating MLR, quality initiatives include health insurers’ involvement and investments in public health initiatives.

Thank you for consideration on this important issue.

Sincerely,

Colleen Lammel-Harmon, RD, LDN
Wellness Manager, Chicago Park District
