Re: Calculation of Medical Loss Ratio Recommendations

Dear Mr. Felice, Mr. Ostlund, and Subgroup members:

I am the Executive Director of the Oklahoma City Community Foundation. We have been a partner with the Oklahoma Caring Foundation for several years. Our joint efforts have supported the delivery of immunizations to children in day-care programs throughout Central Oklahoma. We are pleased to support the Oklahoma Caring Foundation and attribute much of our state’s effort to increasing immunization rates to their efforts.

I am writing to urge the National Association of Insurance Commissioners (NAIC) to consider and recommend to the Department of Health and Human Services (HHS) a definition of medical loss ratio (MLR) that will encourage health plans to continue their tremendous support of community-based public health initiatives and programs like these efforts for immunization.

The membership of NAIC is state-based and so should understand well the important contributions that local organizations make to the overall health of communities and populations. I want to make sure that health insurers will continue their critical participation in these efforts.

It is my understanding that if the definitions around MLR are too narrow, health insurers will not be encouraged to support community-based health initiatives and could, in fact, be penalized for such support if their contributions are counted as administrative expenses. Penalizing Blue Cross Blue Shield of Oklahoma’s support of the Oklahoma Caring Van Program and similar community-based programs across the nation would not be wise public policy.

I strongly urge the NAIC to recommend to HHS that for the purpose of calculating MLR, quality initiatives include health insurers’ involvement and investments in public health initiatives.

Thank you for consideration on this important issue.

Sincerely,

Nancy B. Anthony
Executive Director
