ANNUAL STATEMENT INSTRUCTIONS – LIFE, HEALTH, PROPERTY & FRATERNAL

SUPPLEMENTAL HEALTH CARE EXHIBIT – PARTS 1, 2 AND 3

The purpose of this supplemental exhibit is to assist state and federal regulators in identifying and defining elements that make up the medical loss ratio as described in Section 2718(b) of the Public Health Service Act (PHSA) and for purposes of submitting a report to the Secretary required by Section 2718(a) of the PHSA. The supplemental exhibit is also intended to track and compare financial results of healthcare business as reported in the annual financial statements. Thus, the numbers included in this supplemental exhibit are not the exact numbers that will be utilized for rebate purposes due to possible revisions for claim reserve run-off subsequent to year end, statistical credibility concerns and other defined adjustments (note: regulators will continue to consider the need for a reconciliation from the data in this supplemental exhibit to the data used for rebate purposes).

A schedule must be prepared and submitted for each jurisdiction in which the company has written direct comprehensive major medical health business, or has direct amounts paid, incurred or unpaid for provisions of health care services. In addition, a schedule must be prepared and submitted that contains the grand total (GT) for the company. **However, insurers that have no business that would be included in Columns 1 through 3 are not required to complete this supplement. Similarly, insurers in run off (claims incurred with zero premiums) are not required to complete this supplement.** The allocation of premium and claims between jurisdictions should be based upon situs of the contract. For purpose of this exhibit, situs of the contract is defined as “the jurisdiction in which the contract is issued or delivered as stated in the contract.” For individual business sold through an association, the allocation shall be based on the issue state of the certificate of coverage. For small employer business issued through a group trust, the allocation shall be based on the location of the small employer.

Include only in this schedule the business issued by this reporting entity. Business that is written by an unaffiliated entity as part of a package provided to the consumer (e.g., inpatient written by this legal entity, outpatient written by unaffiliated separate entity) should not be included in this exhibit. Similarly, business written by an affiliated legal entity as part of a package provided as an option to the group employer (e.g., out of network coverage written by an affiliated entity and in-network coverage written via this legal entity) should not be included in this exhibit.

Comprehensive health coverage, columns 1 through 3, includes business that provides for medical coverages including hospital, surgical and major medical. Include risk contracts and Federal Employees Health Benefit Plan (FEHBP).

Do not include business specifically identified in other columns (e.g. uninsured business, Medicare Title XVIII, Medicaid Title XIX, vision only, dental only business, Insurance Program (SCHIP), Medicaid Program Title XXI risk contracts, and short-term limited duration insurance).

Column 5 – HIT Expenses for Health Care Quality Improvements

The PPACA also contemplates “Health Information Technology” as a function that may in whole or in part improve quality of care, or provide the technological infrastructure to enhance current QI or make new QI initiatives possible. Include HIT expenses required to accomplish the activities reported in Columns 1 through 4 that are designed for use by health plans, health care providers, or enrollees for the electronic creation, maintenance, access, or exchange of health information in the following ways;

1. Monitoring, measuring, or reporting clinical effectiveness including reporting and analysis costs related to maintaining accreditation by nationally recognized accrediting organizations such as NCQA or URAC; or costs for public reporting of quality of care, including costs specifically required to make accurate determinations of defined measures (e.g., CAHPS surveys or chart review of HEDIS measures and costs for public reporting mandated or encouraged by law;
2. Advancing the ability of enrollees, providers, insurers or other systems to communicate patient centered clinical or medical information rapidly, accurately and efficiently to determine patient status, avoid harmful drug interactions or direct appropriate care – this may include Personal Health Records accessible by enrollees and appropriate providers to monitor and document an individual patient’s medical history;
3. Tracking whether a specific class of medical interventions or a bundle of related services leads to better patient outcomes; or
4. Reformatting, transmitting or reporting data to **recognize** national or international government-based health organizations for the purposes of indentifying or treating specific conditions or controlling the spread of disease.
5. Other expenses as may be recommended by the NAIC and certified by the HHS Secretary, upon an adequate showing that the costs support the activities described in columns 1 through 4 or otherwise support monitoring, measuring, or reporting health care quality improvement. The burden shall be on the proponent to show that the expenses meet these criteria.

Exclude: Costs associated with establishing or maintaining a claims adjudication system, including costs directly related to upgrades in HIT that are designed primarily or solely to improve claims payment capabilities or to meet regulatory requirements for processing claims (e.g., costs of implementing new administrative simplification standards and code sets adopted pursuant to the Health Insurance Portability and Accountability Act (HIPAA), 42 U.S.C. 1320d-2, as amended, including the new ICD-10 requirements **[Lou asked for a sense of industry costs yet to be incurred for ICD-10]**). **[No comments on ICD-10, but it will be included as a point of issue as the proposal is sent up to its parent, etc.]**

Expense Allocation: A separate, regulator only supplemental filing must be made by the insurer to provide a description of the method utilized to allocate QI expenses to each State and to each line and column on Part 3. Additionally, companies reporting QI expenses in columns 1 through 5 must include a detailed description of such expense elements, including how the specific expenses meet the definitions above. For a **new initiative** that otherwise meets the definition of QI above but has not yet met the objective, verifiable results requirement, include an “X” in the “New” column of the supplement and include in the description the expected timeframe for the activity to accomplish the objective, verifiable healthcare quality improvement. These will be reviewed for adherence to the definition and standards of QI and may be specifically incorporated into, or excluded from, the instructions for QI for future reporting purposes. **[This section is open for comment]**

Note: 24 Hour **Medical Healthcare** Professional Hotlines: Expenses for 24 **hour medical healthcare** professional **nurse** hotlines should be included in Improve Health Outcomes, Activities to Prevent Hospital Readmissions, Improve Patient Safety and Reduce Medical Errors, and Wellness & Health Promotion Activities. Any other expenses for 24 hour **medical healthcare** professional hotlines (e.g., answering **non-clinical** member questions) should be excluded from Improving Health Care Quality Expenses and instead included in Claims Adjustment Expenses.

The following items are broadly excluded as not meeting the criteria of this section:

- 24 Hour **Medical Healthcare** Professional Hotlines (except as noted above);
- Utilization Review;
- Fraud Prevention activities;

- Network Management;
- Provider Contracting;
- Accreditation Fees [Available for comments];

- Any function not expressly included in Columns 1 through 5.
