

# Solvency Modernization Initiative Web Conference

Access this previously recorded presentation for learning at your convenience!

The NAIC's Solvency Modernization Initiative (SMI) was announced in June 2008. Among other things, it includes study of financial supervisory modernization initiatives and solvency proposals in place or under development in other jurisdictions, including Australia, Canada, Switzerland, and the European Union. The initiative places emphasis on five key focus areas: capital requirements, international accounting, insurance valuation, reinsurance, and group solvency.

On April 28, 2010, the NAIC assembled a group of experts to address these five areas, as well as corporate governance, which is emerging as an added area of focus. Their presentations also provided an introduction to the existing solvency framework and the purpose and specific objectives of the SMI. Because of the importance of this topic, the conference was archived and is now available for you to access on demand.
