

The NAIC is **guidance you can count on** for insurance regulatory and compliance training. Over 40,000 people have participated in NAIC courses and seminars since 1989. See what others have said about their experience with our courses!

As someone new to statutory investment accounting, I have found the programs have been most educational. I have a long way to go yet, but I feel certain that your guidance will get me there.

Holly McCool, Parkland Community Health Plan

The guidance that really stands out for me at the present time is the Risk-Focused Examination training. The risk-focused approach has revolutionized the way we perform examinations, and the training from the NAIC has provided examiners in the field with the skills needed to make the transition.

Bert Karau, Washington State Office of the Insurance Commissioner

The NAIC's Integrating Market Regulation online course provided me and my staff with valuable information on the NAIC website. I have worked in insurance regulation for about 4 years and was unaware of the many resources available to regulators through the NAIC website until completing the course.

Mary Nugent, Maryland Insurance Administration
