

ATFs with InfoReqs Past 90 Day Expiration Period

This list includes ATFs with open InfoReqs that have reached the end of their 90-day retention period and will be deleted from ISIS on the last business day of the respective month. At that time, the ATF and supporting documentation will be discarded and holders of that security will have to submit a new ATF.

For example, the May 2005 list will comprise of all ATFs with open InfoReqs scheduled for deletion by May 31, 2005. The deletion process will then occur on May 31st for ATFs without complete supporting documentation.

You can check the Inquiry Service to see the status of the InfoReq. If an InfoReq Response ATF was received at the SVO, the date it was received is displayed in the **SVO Mailroom Date** field toward the bottom of the screen. If some but not all of the requested documents were submitted, the date each document was received at the SVO is displayed in the **Date Received** field next to the description of the document. You must use the **InfoReq Response ATF** to submit them.

Please submit any inquiries about a particular ATF to the SVO Inquiry Help Desk at svoinquirydesk@naic.org.
