

## ALLOCATION OF SURPLUS LINES AND INDEPENDENTLY PROCURED INSURANCE PREMIUM TAX ON MULTI-STATE RISKS MODEL REGULATION

### Table of Contents

Section 1.	Purpose
Section 2.	Allocation of Premium Tax on Multi-State Risks
Section 3.	Reporting and Remittance of Tax
Appendix A.	Allocation Schedule
Appendix B.	Tax Allocation Report

### Section 1. Purpose

The purpose of this regulation is to:

- A. Implement the provisions of Section [insert citation to state law equivalent to Section 5 of the Nonadmitted Insurance Model Act] by requiring surplus lines licensees to allocate premiums where a placement of surplus lines insurance covers properties, risks or exposures located or to be performed in various states (multi-state risks);
- B. Facilitate payment of surplus lines tax or independently procured insurance tax in this state pursuant to [cite state law equivalent to Section 6 of the Nonadmitted Insurance Model Act]; and
- C. Provide a mechanism by which a surplus lines licensee or insured shall allocate premiums and pay premium taxes to each state where placement of surplus lines insurance covers properties, risks or exposures located or to be performed in each state.

### Section 2. Allocation of Premium Tax on Multi-State Risks

- A. In determining the amount of premiums taxable in this state, all premiums written, procured or received in this state shall be presumed to be written on properties, risks or exposures located or to be performed in this state, except
  - (1) For a reciprocal state, premiums that are allocated or apportioned as taxable premiums of the reciprocal state in accordance with the provisions of this regulation, but the tax payable to this state shall not be less than the tax due pursuant to this regulation. However, if the amount of tax due under this provision is less than \$50 in any jurisdiction, it shall be payable in the jurisdiction in which the affidavit is required to be filed; or
  - (2) For a nonreciprocal state, premiums that are allocated or apportioned as taxable premiums of the nonreciprocal state and the taxes have been paid to the nonreciprocal state.
- B. On an insurance policy covering properties, risks or exposures located or to be performed in various states, the tax to be paid to the commissioner of each state shall be computed on that portion of the policy premium that is attributable to properties, risks or exposures located or to be performed in each state.
- C. The surplus lines licensee or the insured who has independently procured insurance shall determine the taxable portion of the premium by using one of the following methods:
  - (1) Allocate premium on the same basis or bases used to establish the policy premium; or
  - (2) Allocate premium as prescribed in the allocation schedule in Appendix A of this regulation that pertains to the classification describing the coverage, subject to the following:
    - (a) If the allocation schedule does not identify a classification appropriate to the properties, risks or exposures being insured, the surplus lines licensee or the insured who has independently procured insurance shall use an alternative equitable method of allocation; and

- (b) If a policy covers more than one classification:
  - (i) For any portion of the coverage identified by a classification on the allocation schedule, the tax shall be computed by using the allocation schedule for the corresponding portion of the premium;
  - (ii) For any portion of the coverage not identified by a classification on the allocation schedule, the tax shall be computed in accordance with Subparagraph (a) of this paragraph; and
  - (iii) For any portion of the coverage where the premium is indivisible, the tax shall be computed by using the method of allocation that pertains to the classification describing the predominant coverage.
  
- D. If the information provided by the surplus lines licensee or the insured who has independently procured insurance is insufficient to substantiate its method of allocation, or if the commissioner determines that its method is incorrect, the commissioner shall determine the equitable and appropriate amount of tax due to this state, as follows:
  - (1) If the allocation schedule identifies a classification appropriate to the coverage, the commissioner shall use the method prescribed in Subsection C.
  - (2) If the Allocation Schedule does not identify a classification appropriate to the coverage, the commissioner, in determining the equitable and appropriate amount of tax due to the state, shall give significant weight to documented evidence of the underwriting bases and other criteria used by the insurer. The commissioner may also consider other available information, to the extent sufficient and relevant, such as the percentage of the insured's physical assets in this state, the percentage of the insured's employee payroll in this state, the percentage of the insured's sales in this state and the amount of premium tax paid to another jurisdiction for the policy.

**Drafting Note:** In some states, determination of, and payment of, tax is the responsibility of a state official other than the commissioner. Subsection D should be modified as necessary to reflect state law.

### **Section 3. Reporting and Remittance of Tax**

- A. Each licensee or insured who has independently procured insurance shall file a tax allocation report, as specified in Appendix B of this regulation. The filing of a tax allocation report and the remittance of tax may be made by a person authorized by the insured to act as its agent.
- B. The commissioner shall at least annually furnish to the commissioner of a reciprocal state a copy of all filings reporting an allocation of taxes required by this section.
- C. The preparation and submission of tax allocation reports and the payment of independently procured insurance taxes by a surplus lines licensee of another state to the commissioner of this state either directly or indirectly for lawful transactions taking place outside this state shall not be considered the placement of insurance in this state by the surplus lines licensee.

**This chart is intended to provide readers with additional information to more easily access state statutes, regulations, bulletins or administrative rulings related to the NAIC model. Such guidance provides readers with a starting point from which they may review how each state has addressed the model and the topic being covered. The NAIC Legal Division has reviewed each state’s activity in this area and has determined whether the citation most appropriately fits in the Model Adoption column or Related State Activity column based on the definitions listed below. The NAIC’s interpretation may or may not be shared by the individual states or by interested readers.**

**This chart does not constitute a formal legal opinion by the NAIC staff on the provisions of state law and should not be relied upon as such. Nor does this state page reflect a determination as to whether a state meets any applicable accreditation standards. Every effort has been made to provide correct and accurate summaries to assist readers in locating useful information. Readers should consult state law for further details and for the most current information.**

**KEY:**

**MODEL ADOPTION:** States that have citations identified in this column adopted the most recent version of the NAIC model in a **substantially similar manner**. This requires states to adopt the model in its entirety but does allow for variations in style and format. States that have adopted portions of the current NAIC model will be included in this column with an explanatory note.

**RELATED STATE ACTIVITY:** Examples of Related State Activity include but are not limited to: older versions of the NAIC model, statutes or regulations addressing the same subject matter, or other administrative guidance such as bulletins and notices. States that have citations identified in this column **only** (and nothing listed in the Model Adoption column) have **not** adopted the most recent version of the NAIC model in a **substantially similar manner**.

**NO CURRENT ACTIVITY:** No state activity on the topic as of the date of the most recent update. This includes states that have repealed legislation as well as states that have never adopted legislation.
