Innovation - Center for Insurance Policy & Research (CIPR)

The CIPR's Innovation Program will focus on innovative thinking, new and emerging technologies, the market implications of these trends and how regulation fits into the innovation paradigm. The program will kick off on Wednesday with our third annual educationally-focused Pitch Competition where InsurTech start-ups will showcase their innovative ideas to a panel of judges. Following will be an innovation keynote panel discussion with some of the top thought leaders in the insurance industry. The keynote panel will share their insights on the current state and future direction of insurance. The day will close with two sessions examining some of the most talked about topics today in insurance— blockchain technology and data privacy. Thursday will open with a session exploring the opportunities and challenges of cloud technology within the insurance industry, followed by tracks on artificial intelligence, cyber insurance, RiskTech and others you don't want to miss! The Innovation Program will end with a series of sessions exploring how to unlock and foster a culture of innovation as well as the regulatory and organizational obstacles to innovation.
