The National Association of Insurance Commissioners (NAIC) is providing a proprietary report with information regarding non-agency Residential Mortgage-Backed Securities (“RMBS”) and Commercial Mortgage-Backed Securities (“CMBS”), hereafter known as the 2015 “RMBS/CMBS Structured Securities Report” or “Report.” The NAIC owns and retains all rights to the data within the Report.

I shall not market, sell, share, transfer or otherwise distribute this data in any manner or form, including on a local area network, to any other person that is not my insurance company affiliate, it being understood that “affiliate” is any entity wholly controlling, controlled by, or under common control of Licensee. Notwithstanding the foregoing, I shall have the right to reproduce the information and data (in whole or in part, in any medium or format) for my company’s internal use and to store the information(5,8),(994,992) in one or more databases for interrogation, analysis, manipulation, compilation, report preparation or later retrieval. Even after signing the Terms of Use as a permitted user, TPAs must obtain written authorization from the NAIC to use the Report for each insurance company client. Permission will only be granted after the insurer has paid its assessed modeling fee to the NAIC. The TPA is restricted from using the Report for any
insurance company client that has not paid its 2015 Structured Securities modeling fee or assessment to the NAIC. In addition, the TPA agrees not to market, sell, share, transfer or otherwise distribute this data in any manner or form. The NAIC reserves the right to revise these Terms of Use at any time by updating this posting.

(By clicking “AGREE” I am bound to these terms.)
Introduction to Structured Securities

In 2009 members of the National Association of Insurance Commissioners (NAIC) approved the recommendation of the Valuation of Securities (E) Task Force and Financial Condition (E) Committee to create a new modeling and assessment process for non-agency residential mortgage-backed securities (RMBS). This assessment process will assist state regulators in ultimately determining the Risk Based Capital (RBC) requirements for the non-agency RMBS/CMBS owned by U.S. insurers at the end of each year. For each of the RMBS/CMBS CUSIPs, the new model will produce prices based upon expected losses for each NAIC designation. Insurers will map the carrying value of each RMBS to these amounts to determine the appropriate NAIC designation and accompanying RBC requirements.

Members of the NAIC have also authorized an assessment of the costs associated with this project to those U.S. insurers that own non-agency RMBS/CMBS subject to the modeling process. An assessment of the costs associated with this project are billed to the insurance companies owning non-agency RMBS/CMBS CUSIPs subject to the new modeling and assessment process, based on Schedule D information from December 31st, statutory annual statement filings.

The NAIC will include all securities that have been identified as non-agency RMBS/CMBS held by insurers as of the Annual and 2nd Quarter in the first file delivery in late December annually. Securities that were identified after the 2nd Quarter cut-off will be analyzed and released in a similar format on late January.
